

SLF

extra flat

Ahead though decades of experience!

Ahead though decades of experience

The low unit with a smooth surface allows mowing even under young plantations with low-hanging fruit. The mower is easy to handle with an excellent overview during working processes – even in the end areas of fruit plantations. A good investment – thanks to its long life cycle and simple maintenance, too.

Herbicide spraying head with two own sprays

SLF with parallelogram displacement

SLF-M front mounting with hydraulic outreach on the left

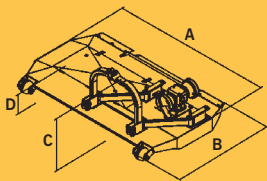

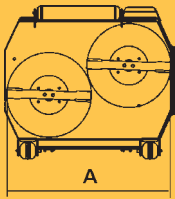

Support for spraying equipment mounting with gear drive output shaft

Brush Twister with self supply pump and tank

Front and rear mounting with gear drive output shaft for changing rotating direction
